

LINCOLN ROWING CENTRE

LINCOLN HEAD

13 MARCH 2022

Travel & Parking Arrangements

There are two landing stages in use for Lincoln Head; the LINCOLN stage is on the North side of the river, next to the boat house and the BOSTON landing stage, as used for the Boston Marathon, is on the South side of the river close to the Titanic Building. Both are situated downriver from Stamp End Lock. Crews allocated to the BOSTON landing stage should park boat trailers and tow vehicles in the car park parallel to the Titanic Building (which houses *Lincs FM*, *LA Fitness Heath Club* and *Anglian Water*) leaving spaces adjacent to the buildings free and accessible for anybody working in the building. For those using the LINCOLN landing stage, trailers should be parked parallel to the riverbank in the shallow lay-by east of the boathouse, towing vehicles and private cars should then be driven over the Titanic Bridge and parked in the large car park east of the Titanic Building past Beech House: See photos below.

Sat Nav

For Sat Nav purposes, the intersection of Waterside South with either Spa Road (if recognised) or Broadgate may be useful or Bifrangli Engineering which is past the rowing club postcode LN2 5TB; NOTE it is only possible to turn onto Waterside South when travelling SOUTH down Wragby Road / Broadgate.

Lincoln Rowing Centre	SK 98592 71030	LN2 5TB	///line.scuba.expect
Beech House Car Park	SK 98643 70974	LN5 7JH	///metro.visits.feels

From the North or A46 from Newark or A15 from south

If unsure of navigation to Lincoln RC, drivers of vehicles with trailers are recommended to follow the Lincoln northern/eastern bypass around to the east of Lincoln to the junction with the A158 then turn west towards Lincoln signposted St Giles at the roundabout. Drive towards the cathedral straight along Bunkers Hill and Wragby Road then follow Wragby Road LEFT and follow this for about $\frac{3}{4}$ mile down the hill as it becomes Broadgate; for those trailers allocated the LINCOLN landing stage turn sharp left into Waterside North just before the Witham Bridge (British Legion on this corner), for those allocated the BOSTON Landing turn sharp left into Waterside South immediately after crossing the Witham Bridge. A footbridge crosses Broadgate overhead at these turnings. NOTE: If you have gone under this footbridge you have missed both turnings. Both roads then run parallel with the River Witham until Stamp End Lock, you will then pass under the Railway Bridge and BOSTON Landing stage parking is on your right and the LINCOLN landing stage parking is past the boat house on the bank side. Please be aware that these roads are narrow and take care.

There is sufficient parking available for vehicles and trailers in the car parks in front of the Titanic Building, but please be aware that the LINCOLN landing stage area is for trailers ONLY. Please follow the instructions of attendants who will direct you to a suitable space. NOTE: This car park will be in use by workers from the adjacent buildings, so your co-operation in not blocking any entrances or exits that allow access will be appreciated. Lincoln Rowing Centre, the site owners, or their agents, cannot be held responsible for any losses or damages whilst using the car parks.

Additional parking for cars only is available further along the road past Beech House.

Special Items.

At previous events held at Lincoln, the local companies have complained about visitors using the verge as a toilet; please ensure all your members use the toilet facilities provided.

There maybe people working in the buildings adjacent to the “Boston-side” car-park. PLEASE ensure you do not block access to car park spaces next to the buildings – includes access for emergency vehicles. You will be allocated a trailer space with room to rig & de-rig boats with sufficient space to avoid the need to block access.

SOUTH SIDE (BOSTON landing stage) CAR PARK PLAN
